

INCOME QUALIFIED PROGRAM

Single Family Weatherization Assistance Program for Income Qualified Customers

New Mexico Gas Company sponsors the New Mexico EnergySmart program, which provides income-qualifying customers with no-cost home weatherization and installation of energy-saving measures to help improve the energy efficiency of their homes and lower their utility bills.

NEW HOME CONSTRUCTION

ThermSmart New Homes

The ThermSmart New Homes Program provides incentives to homebuilders to encourage construction of homes in NMGC's service territory that exceed current building codes and standards. To qualify, homebuilders can choose the prescriptive path with several qualified measures to choose from or the performance path in which incentive levels are based upon modeled therm savings above code (10% minimum), with additional bonus triggers for additional increases in efficiency.

MULTI-FAMILY PROGRAM

New Mexico Gas Company's Multi-Family Program provides incentives to multi-family property owners to increase the energy efficiency of their properties. The program offers larger scale measures such as equipment upgrades of boiler and HVAC systems.

EFFICIENT BUILDINGS PROGRAM

The Efficient Buildings Program improves energy efficiency and reduces operating costs with objective no-cost consulting to help commercial customers identify cost-effective projects, properly evaluate vendor proposals and leverage the resulting energy savings and financial incentives.

Save energy and money with rebates on a wide range of natural gas appliances and equipment including space and water heating equipment, ENERGY STAR commercial food service equipment, commercial laundry equipment and much more. Services include:

- Prescriptive Rebate Programs on a wide range of natural gas appliances and equipment
- Rebate programs on a variety of custom upgrades
- Technical assistance to help identify and evaluate energy efficiency opportunities
- Financial incentives for retrofit/renovation and new construction projects that save on natural gas usage
- Benchmarking educational facilities' energy use
- Energy Master Planning Workshops to help manage energy costs
- Identifying cost-effective projects

SAVING RESOURCES, SAVING MONEY.

Energy Efficiency Rebate Programs

New Mexico
GAS COMPANY®
AN EMERA COMPANY

New Mexico Gas Company's Energy Efficiency Rebate Programs can help you use energy wisely, cut costs, identify necessary upgrades and get hundreds and even thousands of dollars in rebates. Whether you're a homeowner or a business owner, you can take advantage of several programs that help with the cost of the upgrade and provide substantial savings for years to come.

To learn more about any of New Mexico Gas Company's Energy Efficiency Rebate Programs, connect with participating contractors, and download rebate forms, visit nmgco.com/energyefficiency.

RESIDENTIAL PROGRAMS

SPACE HEATING

ENERGY STAR® Furnace Program

The cost to heat your home can be significant, but a new ENERGY STAR gas furnace with an A.F.U.E. rating of 92 percent or greater can provide immediate and long-term savings. To help with the upfront cost, New Mexico Gas Company offers a tiered rebate program with increasing rebates for increasing efficiencies. Since the cost to replace an existing furnace is higher than the cost of a new installation, homeowners can get rebates up to \$375. Rebates of up to \$300 are available for homebuilders.

ENERGY STAR® Boiler Program

Approximately 45 percent of your energy bills goes toward heating your home. If you use a boiler system, upgrading to a new, more efficient model can have a huge impact on your monthly bill. New Mexico Gas Company offers a tiered rebate program (based on A.F.U.E. rating) with increasing rebates for increasing efficiencies. Homeowners can take advantages of rebates up to \$375 and homebuilders can get up to \$300 in rebates.

Insulation Program

Enjoy year-round savings when you upgrade the insulation in your home's roof or attic. Insulation helps retain the heat in your home during the winter and keep your home cooler in the summer. The R-value of insulation indicates its resistance to heat flow: the higher the R-value, the greater the effectiveness. Depending on the existing level of insulation in your home, New Mexico Gas Company offers a two-tier program.

Tier I: Existing roof insulation R-11 or less; Add R-19 or greater; **\$500 Rebate**

Tier II: Existing roof insulation R-11 to R-19; Add up to R-38; **\$300 Rebate**

Smart Thermostat Program

Smart thermostats help automate your home's energy use around your schedule, preferences, and even the weather.

Easy to use, you can conveniently control and monitor your heating and cooling from anywhere, keeping you comfortable when you're home and saving energy and money when you're not. Instead of manually managing your energy use, let a smart thermostat help you save up to \$130 per year and get a \$50 rebate from New Mexico Gas Company.

WATER HEATING

ENERGY STAR® Tankless Water Heater Program

Heating water is the third largest energy expense, accounting for approximately 14 percent of your utility bills. Replacing your water heater with an energy efficient tankless water heater can provide substantial savings. Install an ENERGY STAR tankless water heater with an Energy Factor of 0.90 or better and get rebates of \$300 for homeowners and \$225 for homebuilders.

Condensing Storage Tank Water Heater Program

Reduce your water heating energy use by 30 percent with an ENERGY STAR qualified gas condensing water heater and be on the forefront of technology. Instead of venting the combustion gases outside the unit, condensing water heaters capture the gases inside the unit to heat the water, making them extremely energy efficient. New Mexico Gas Company offers a \$300 rebate to homeowners and a \$225 rebate to homebuilders.

Low Flow Showerhead Program

We are proud to offer FREE Low Flow Packages to our customers that could save the average residential household more than 75,000 gallons of water and an additional \$150 in natural gas savings over the lifetime of the package. The package includes a high quality 1.5 gallons per minute low flow showerhead, a low flow swivel kitchen faucet aerator, two bathroom faucet aerators, plumbing tape and installation instructions.
